
Data preparation
National deforestation footprint accounting
National-level
• MRIO tables
MRIO
National deforestation footprint
Deforestation emissions embodied in trade
• Domestic, export, import
Spatial disaggregation and parameter calibration
Pixel-level
• Deforestation
• Deforestation drivers
• Deforestation emissions
• Road network
Export priority indicators
• Road density
• Deforestation patch size
Parameter sensitivity analysis
• City and port accessibility
Export priority zones
Spatial allocation
1 km deforestation emissions footprint maps
Accessibility Data
• Travel time to cities
• Travel time to ports
Spatial plausibility assessment
Conventional proportional allocation
Export-priority allocation
City and port accessibility
Relative improvement in spatial plausibility
