Thank you for your comments concerning the correct URL addresses and the correct format for the DOI. We obtained the DOI number from the NSIDC. When we click on the doi number in the abstract, it goes to the URL that you suggest: <http://nsidc.org/data/nsidc-0516.html>. We are unclear about why the URL must be inserted into the location field of the DOI, but we can do so if this is the required format.
