Hi,

I strongly agree with the two last comments especially.

The paper shows an in-depth understanding of the procedure however is very lengthy and lacks very much a concise structure which was very good described by Mr. Humphries in his review. For acceptance this has to be improved thoroughly.

I am not familiar with the authors in particular but with the accusations made here there

should be a further look into this and the mentioned parts in the manuscript have to be changed and originators of data sets have to be cited appropriately.

Best, Moritz Schmid
