Dear Reviewer #1 Dear Prof. Contadakis

Thank you very much for your comprehensive and detailed review on our manuscript about the GTN-P Database. I agree with many of the points Review#1 stated and we will revise the manuscript accordingly. I am glad to hear that our paper meets the

requirements and the scope of ESSD.

We additionally found some mistakes over the time when going over the text and figures again, so I am confident that we are able to produce a revised version of sufficient quality.

If you have any other comments please contact me again. I am very grateful for your efforts you spent and helping us improving the paper.

I will provide a detailed answer to your review together with a new ms version as soon as possible!

With best regards and thank you very much again.

Boris Biskaborn
