

Interactive comment on “Using ground-penetrating radar, topography and classification of vegetation to model the sediment and active layer thickness in a periglacial lake catchment, Western Greenland” by Johannes Petrone et al.

Johannes Petrone et al.

johannes.petrone@skb.se

Received and published: 11 October 2016

The previous version of Figure 8 shows soil temperatures only for the periods of 2011, 2012 and 2013 and not for the whole period of 2011-2015 as indicated in the text. We apologise for the inconvenience and have updated the figure to the correct Figure 8 showing soil temperatures for the period 2011-2015. No changes to figure caption.
