Interactive comment on "Coastline evolution of Portuguese low-lying sandy coast in the last 50 years: an integrated approach" *by* Cristina Ponte Lira et al.

Anonymous Referee #1

Dear Editor and Authors, I found the paper interesting and the produced dataset useful. However, I suggest few minor revisions in order to clarify some points. The main suggestion is to improve the discussion part. Please, find the comments in the attached reviewed version of the paper. Thank you for giving me the opportunity to review the paper. Best Regards
