Corrections were made to the database Global Carbon Budget 2017 v1.2:

- in the ‘Ocean Sink’ sheet: a mistake was corrected in the model average (which used 7 models rather than all 8 models).

- in the ‘Terrestrial Sink’ sheet: a small (<0.1 GtC/yr) adjustment had been made to the LPJ model prior to submission that was not pasted in the submitted file, leading to a small difference (<0.01 GtC/yr) between the model average in that sheet compared to the value in the ‘Global Carbon Budget’ sheet, which was correct.

The main ‘Global Carbon Budget’ sheet had the correct values for both the Ocean and Terrestrial sinks. We thank colleagues for flagging these issues.
