Received and published: 21 December 2017

We have just received a DOI for "El Niño Rapid Response (ENRR) Field Campaign: Surface Fluxes from the NOAA Ship Ronald H. Brown, 2016-02 to 2016-03 (NCEI Accession 0167875)", which is one of the three data sets discussed in this manuscript. The Copernicus staff has added it to the "Assets" page associated with this manuscript, thus making it easier for interested ESSDD readers to access. We will update the bibliographic and citation information in the manuscript later in the revision process.
