This is a note to point out that the NERC Environmental Information Data Centre provides metadata/supporting documentation and data as separate packages. The DOI for each dataset links to a landing page, from which the links to both the data download and document download are displayed clearly. Hence from the DOI links given (https://doi.org/10.5285/7aefe6aa-0760-4b6d-9473-fad8b960abd4 , https://doi.org/10.5285/dc583be3-3649-4df6-b67e-b0f40b4ec895), the data download and information download are in a panel ('Get the data') on the right hand side of the landing pages. For clarity's sake, I will also upload the key supporting information

document as a supplement to the discussion, and any later versions of the manuscript.

Please also note the supplement to this comment:
