

## Ecological survey of 'Key Habitats' in England, 1992-93

### Dataset Documentation

<b>Dataset Name:</b>	<i>Habitat and vegetation data from an ecological survey of terrestrial key habitats in England, 1992-1993</i>
<b>Dataset Background &amp; Description:</b>	Since 1978, a series of national surveys (Countryside Surveys) have been carried out by the Institute of Terrestrial Ecology/Centre for Ecology and Hydrology to gather data on the natural environment. The sampling framework for these surveys is not optimised to yield data on rarer or more specialised habitats. This Key Habitat survey was commissioned in the early 1990s to carry out additional survey work into habitats which were perceived to be under threat or which represented areas of concern to the Department for the Environment. The habitats were: Lowland heath, Chalk and limestone grasslands, Coasts, Uplands. For reporting purposes, the survey was supplemented by additional data, particularly for river valleys and waterside landscapes (lowlands), from Countryside Survey 1990.
<b>Geographic Coverage:</b>	England
<b>Time Period:</b>	1992-93
<b>Data Categories:</b>	<p>Vegetation Data: Vascular plants. Bryophytes. Lichens.</p> <p>Boundary data: Boundary descriptions at grid points across each 1km survey square</p> <p>Habitat Data: Land cover data at grid points across each 1km survey square</p>
<b>Survey Design &amp; Methods:</b>	Stratified sampling across entire area. Bunce & Shaw's 1973 standardized survey methods with modifications – refer to field handbooks.

<b>Quality control:</b>	<i>All data were collected by trained surveyors. Collected data have been checked and verified as far as possible.</i>

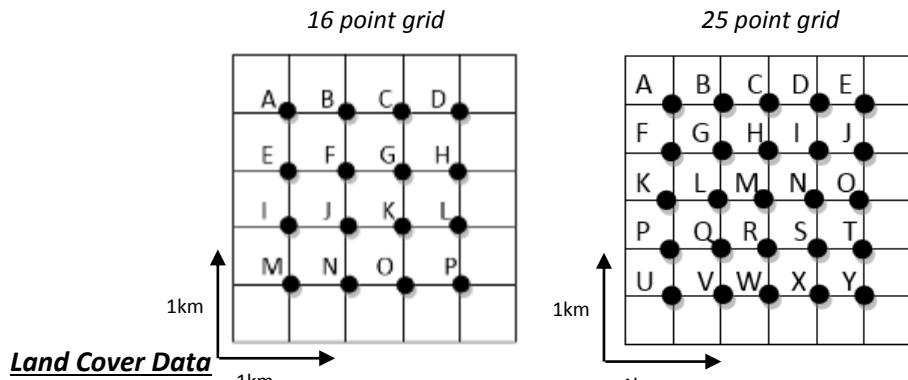

## Geographical Coverage

## Key Habitat Survey of England 1992-93 - Habitat Data & Boundary Data

---

At each point on a regular grid (16 or 25 depending on landscape/habitat type), within 1 km survey squares, codes describing land cover and the nearest boundary were recorded. Refer to field handbooks for more detail (Barr, 1992; Barr, 1993).

**Land Cover Data**  
 Land Cover at each grid point was described using Countryside Survey 1990 Codes. A list of these codes can be found in Appendix II. The codes reflected the “mappable unit” in which the point fell. The minimum mappable unit was 400m<sup>2</sup>. Each mappable unit was determined by the constancy of the codes which described it. If one characteristic (e.g. cover of a dominant plant species) was sufficiently different from an adjacent area to be given a different code then a new mappable unit was recognised.

### Boundary data

The nearest vertical boundary to each grid point (within 100m) was described using Countryside Survey 1990 Codes. A list of these codes can be found in Appendix III. The point on the boundary which was nearest to the grid point was recorded as part of a length which can be coded constantly as part of a single unit of not less than 20m (the minimum mappable length). If the nearest point on the boundary was part of a longer length, then the coding reflected the variability of the longer length. Vertical boundaries included: hedgerows, walls, fences, earth/stone banks acting as field boundaries; any combination of these.

## Key Habitat Survey of England 1992-93 - Vegetation Data

---

Detailed plant species information was collected from a series of plots (as outlined in table 1). In this survey, 4 types of plot were used:

- Main (X) plots: these were either 4m<sup>2</sup> or 200m<sup>2</sup> (nested), depending on the landscape type (see table 1) and were located at five of the grid points within the square (200m<sup>2</sup>) or all grid points (4m<sup>2</sup>).
- Targeted (Y) plots: these are 4m<sup>2</sup> and 5 were placed in semi-natural vegetation types/habitats that had not been covered by the main plots.
- Stream side (S) and waterside (W) plots: these are 10 x 1m plots and up to 5 were placed immediately adjacent to watercourse where present, in Upland Landscapes only.
- Roadside (R) and Verge (V) plots: these are 10x1m plots and up to 5 were placed immediately adjacent to roads where present in Limestone and Chalk landscapes only.

Table 1: Summary of Survey Sites (refer to field handbooks)

Habitat	No. of 1km squares	Map Grid	X Plots (200m <sup>2</sup> )	X plots (2x2m)	Y Plots (2x2m)	SW plots (10x1m)	RV plots (10x1m)	Year surveyed
<i>Calcareous</i>	43	16 points, A-P	-	5 plots recorded at AJGDP	5 at locations selected by surveyor	-	5 plots adjacent to roadsides.	1993
<i>Coastal</i>	49	25 points, A-Y	5 plots recorded at points ALITW	-	5 at locations selected by surveyor	-	-	1993
<i>Lowland Heath</i>	89	25 points, A-Y	-	25 plots, on grid.	-	-	-	1992
<i>Upland Heath</i>	32	16 points, A-P	5 plots recorded at AJGDP	-	5 at locations selected by surveyor	5 plots adjacent to watercourses	-	1993
<i>Total</i>	213	--	241	662	620	150	201	-

Table 2: Summary of Vegetation Plots

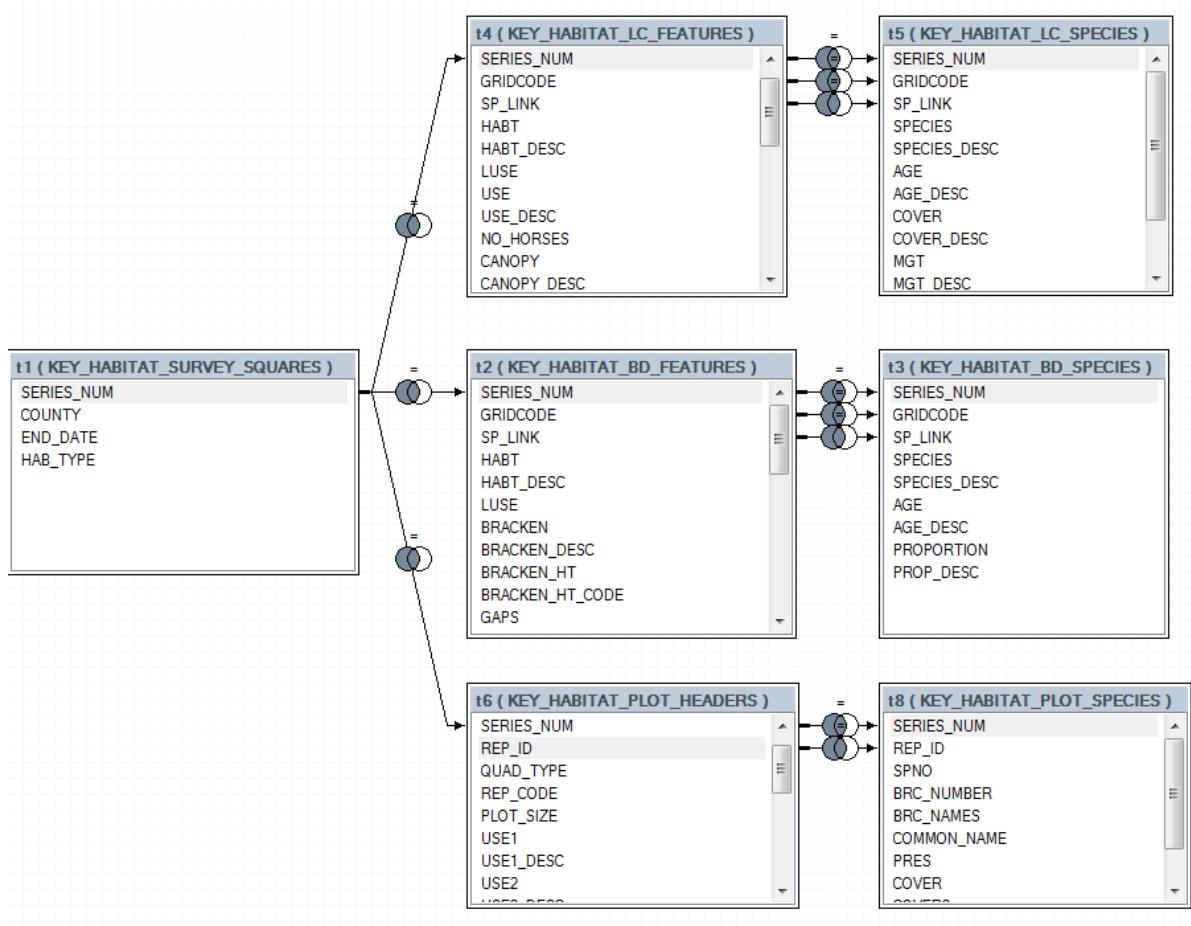

Habitat	No. of 1km squares	X Plots (200m <sup>2</sup> )	X plots (4m <sup>2</sup> )	Y Plots (2x2m)	SW plots (10x1m)	RV plots (10x1m)
Calcareous	43	-	122	215	-	81(R) 120(V)
Coastal	49	93	-	245	-	-
Lowland Heath	89	-	540	-	-	-
Upland Heath	32	148	-	160	60 (S) 90 (W)	-
<i>Total</i>	213	241	662	620	150	201

*Note: 35 squares have no plot data, mostly in the lowland heath habitat*

## List of tables

Table Name	Description
<i>Key_Habitat_Survey_Squares.csv</i>	List of set of 1km squares surveyed, for each habitat type
<i>Key_Habitat_Plot_Headers.csv</i>	Vegetation plot header information and location
<i>Key_Habitat_Plot_Species.csv</i>	List of plant species recorded within each vegetation plot
<i>Key_Habitat_LC_Features.csv</i>	Land cover data mapped at each grid point within squares
<i>Key_Habitat_LC_Species.csv</i>	Species details pertaining to land cover features in Key_Habitat_LC_Features table
<i>Key_Habitat_BD_Features.csv</i>	Boundary data mapped at each grid point within squares
<i>Key_Habitat_BD_Species.csv</i>	Species details pertaining to boundary features in Key_Habitat_BD_Features table

## Table Relationships

## Table Descriptions

### Key\_Habitat\_Survey\_Squares.csv

Information from front cover of Field Assessment Booklet regarding 1km survey square. Site code, county in which located, end of survey date, habitat type.

Column name	Description	Type
SERIES_NUM	Survey square number	Text
COUNTY	County square located in	Text
END_DATE	Date survey square finished	Date
HAB_TYPE	Key Habitat (landscape) type	Text

#### Key Habitat Plot Headers.csv

Vegetation plot header information and location (where known).

Column name	Description	Type
HAB_TYPE	Key Habitat (landscape) type	Text
SERIES_NUM	Survey square number	Text
REP_ID	Code of plot	Text
QUAD_TYPE	Type of plot: Y (targeted), X (main plot), R (roadside), V (verge), S (stream), W (waterside) (see handbook)	Text
REP_CODE	Number of plot if X, Y, R or V plot types (rather than alphabetic grid codes)	Text
PLOT_SIZE	Size of plot: Y= 2x2m, X= 200m <sup>2</sup> (14.1x14.1m) or 2x2m, R=10x1m S=10x1m (see handbook)	Text
USE1	Land Use code 1 (from plot sheet)	Numeric
USE1_DESC	Land Use code 1 description	Text
USE2	Land Use code 2 (from plot sheet)	Numeric
USE2_DESC	Land Use code 2 description	Text
USE3	Land Use code 3 (from plot sheet)	Numeric
USE3_DESC	Land Use code 3 description	Text
PHYS	Physiology code (from plot sheet)	Numeric
PHYS_DESC	Physiology description	Text
SLOPE	Slope description. (from plot sheet) Flat (no slope discernable), Slight (<5° by eye), Moderate (6-15°), Steep (>15)	Text
ASPECT	Aspect in degrees from north. None if flat (from plot sheet)	Numeric
SHADE	Shade description (from plot sheet). Full/open/partial/none	Text
GRAZING	Grazing description (from plot sheet)	Text
SUBSTRATE	Substrate description (from plot sheet)	Text
SOIL_DEPTH	Soil depth (from plot sheet)	Text
DESCRIPTION1	Site description 1 – notes (from plot sheet)	Text
DESCRIPTION2	Site description 2 – notes (from plot map sheet)	Text

#### Key Habitats Plot Species.csv

List of plant species and covers recorded within each vegetation plot. Note: Bare ground and total bryophytes not entered in R/V or S/W plots.

Column name	Description	Type
SERIES_NUM	Survey square number	Text
REP_ID	Plot code description, sometimes the same as Gridcode in squares where plots were done on the 16/25 point grid	Text
SPNO	Species code number	Numeric
BRC_NUMBER	Biological record centre species code	Text
BRC_NAMES	Biological record centre species name (Stace, 2010)	Text
COMMON_NAME	Common name of species where available	Text
PRES	Quadrat nest number in which species first appears ( <i>see handbook</i> ). If relevant COVER or COVER2 is 0 and PRES >=1, then species is present at <5% cover. For Total Bryophytes and Lichens, 0 = whole quadrat.	Numeric
COVER	Cover % for inner quadrat 4m <sup>2</sup> where plots are 200m <sup>2</sup> , otherwise whole plot for un-nested plots	Numeric
COVER2	Cover % for entire plot 200m <sup>2</sup> where plots are 200m <sup>2</sup> , otherwise N/A.	Numeric
HAB_TYPE	Key Habitat (landscape) type	Text

### Key\_Habitat\_LC\_Features.csv

Land cover data mapped at each grid point within survey squares.

Column Name	Description	Type
HAB_TYPE	Key Habitat (landscape) type	Text
SERIES_NUM	Survey square number	Text
GRIDCODE	Location of plot on square grid	Text
SP_LINK	Additional link to <i>Key_Habitat_LC_Species.csv</i> table	
HABT	Habitat type code	Numeric
HABT_DESC	Habitat type description	Text
LUSE	Land Use Code ( <i>see appendix V</i> )	Text
USE	Use code	Numeric
USE_DESC	Use description	Text
NO_HORSES	Number of horses	Numeric
CANOPY	Canopy code	Numeric
CANOPY_DESC	Canopy description	Text
DESC	Description code	Numeric
DESC_DESC	Description of description code	Text
FOF	Forestry feature type code	Numeric
FOF_DESC	Forestry feature description	Text
FORBS	Forbs cover code	Numeric
FORBS_DESC	Forbs cover description	Text
HEATHER	Heather type code	Numeric
HEATHER_DESC	Heather type description	Text
OTHER	Additional other code	Numeric
OTHER_DESC	Additional other description	Text
PEAT	Peat code	Numeric
PEAT_DESC	Peat cover description	Text
OTHER_USE	Additional use code	Numeric
OTHER_USE_DESC	Additional use description	Text
WEEDPROP	Proportion of weeds code	Numeric

WEEDPROP_DES	Proportion of weeds code	Text
--------------	--------------------------	------

### Key\_Habitat\_LC\_Species.csv

Species details pertaining to land cover features in Key\_Habitat\_LC\_Features table

Column Name	Description	Type
SERIES_NUM	Survey square number	Text
GRIDCODE	Location of plot on square grid	Text
SPECIES	Species code	Numeric
SP_LINK	Additional link to <i>Key_Habitat_LC_Features.csv</i> table	Numeric
SPECIES_DESC	Description of species	Text
AGE	Age code	Numeric
AGE_DESC	Description of age of species	Text
COVER	Percentage cover code of species	Numeric
COVER_DESC	Description of Percentage cover of species. <i>Note: sometimes this refers to the cover of the overall feature - these should be cover codes (COVER) 651-655 but occasionally these have been used for species and there is some confusion.</i>	Text
MGT	Management code	Numeric
MGT_DESC	Description of management	Text
HEIGHT	Height of species	Numeric
HEIGHT_DESC	Description of height	Text

### Key\_Habitat\_BD\_Features

Boundary data mapped at each boundary nearest to grid points within survey squares.

Column Name	Description	Type
SERIES_NUM	Survey square number	Text
GRIDCODE	Location of plot on square grid	Text
SP_LINK	Additional link to <i>Key_Habitat_BD_Species.csv</i> table	Numeric
HABT	Habitat/feature code	Numeric
HABT_DESC	Habitat/feature description	Text
LUSE	Land Use code ( <i>see appendix V</i> )	Text
BRACKEN	Bracken code	Numeric
BRACKEN_DESC	Bracken description	Text
BRACKEN_HT_CODE	Bracken height code	Numeric
BRACKEN_HT	Bracken height description	Text
GAPS	Gaps code	Numeric
GAPS_DESC	Gaps description	Text
MGT	Management code	Numeric
MGT_DESC	Management description	Text
STOCK	Stock proof code	Numeric

STOCK_DESC	Stock proof description	Text
USE	Use code	Numeric
USE_DESC	Use description	Text
DESC1	Description 1 code	Numeric
DESC1_DESC	Description 1 description	Text
DESC2	Description 2 code	Numeric
DESC2_DESC	Description 1 description	Text
DESC3	Description 3 code	Numeric
DESC3_DESC	Description 3 description	Text
OTHER	Other information	Numeric
OTHER_DESC	Other information description	Text
CANOPY	Canopy code	Numeric
CANOPY_DESC	Canopy description	Text
HEIGHT	Feature height code	Numeric
HEIGHT_DESC	Feature height description	Text
HAB_TYPE	Key Habitat type	Text

### **Key\_Habitat\_BD\_Species**

Species details pertaining to land cover features in Key\_Habitat\_BD\_Features table

Column Name	Description	Type
SERIES_NUM	Survey square number	Text
GRIDCODE	Location of plot on square grid	Text
SP_LINK	Link to <i>Key_Habitat_BD_Features.csv</i> table	
SPECIES	Species code	Long integer
SPECIES_DESC	Species description	Text
AGE	Age code (of trees)	Long Integer
AGE_DESC	Age description (of trees)	Text
PROPORTION	Proportion of cover of species code	Long Integer
PROP_DESC	Proportion of cover of species description	Text

### **Appendix 1 - List of Square codes and habitats/landscape types**

289	Windblow	503	Golf course	P			
290	Dead standing trees	P	507	Static caravan(s)	P		

\* P = Primary Code

**Note: Surveyors were allowed to add unique codes in each Square, therefore certain codes will not be listed here**

### Appendix III - Boundary Codes

CODE	DESCRIPTION	CODE	DESCRIPTION	CODE	DESCRIPTION	
34	Rocky/boulder shore	P	237	Elm	352	Not stockproof
38	Sea	P	238	Field maple	353	Filled gaps < 10%
52	Lake - artificial	P	239	Gorse	354	Filled gaps > 10%
53	River	P	240	Hawthorn	355	Signs of replacement
55	Canal	P	241	Hornbeam	356	Signs of removal
56	Stream	P	242	Lime	357	Trimmed
57	Roadside ditch	P	243	Oak	358	Uncut
58	Other ditch	P	244	Poplar	359	Derelict
62	Waterfall	P	245	Rowan	360	Line of relict hedge
63	Gorge	P	246	Sweet chestnut	361	Laying
65	Bank < 1m		247	Sycamore	362	Flailing
66	Bank 1-5m		248	Willow	363	Regrowth from stumps
67	Bank > 5m		250	Mixed broadleaf	364	Bracken present
94	Heather dominant		251	Mixed conifer	410	Embankment
112	Valley bog	P	252	Unspecified broadleaf	421	Residential
113	Fen	P	256	25-50%	443	Derelict
134	Tall herb vegetation	P	257	50-75%	457	Unconstructed track
149	Dactylis glomerata		258	75-95%	640	Blackthorn
151	Phleum pratense		259	95-100%	641	Hazel
162	Vaccinium myrtillus		261	1-4 years	651	10-25% (1ry codes only)
175	25-50%		262	5-20 years	652	26-50%
176	50-75%		263	20-100 years	653	51-75%
178	95-100%		264	> 100 years	654	76-95%
180	10-30cm		267	Landscape	655	96-100%
181	30-50cm		271	Shelter	888	New to map
182	0.5-1m		282	Natural regeneration	999	No longer on map
183	1-1.5m		284	Planted		
184	> 1.5m		286	Staked trees		
189	Sheep		287	Tree protectors		
201	Individual trees	P	290	Dead standing trees	P	
203	Line of trees	P	291	Regrowth - cut stump		
204	Belt of trees	P	295	Bracken - scattered		
205	Clump of trees	P	301	Dry-stone wall	P	
207	Individual scrub species	P	302	Mortared wall	P	
208	Scattered scrub	P	303	Other wall	P	
209	Line of scrub	P	311	Fence - wood only	P	
210	Patch of scrub	P	312	Fence - iron only	P	* P = Primary Code
215	Closed canopy		313	Fence - wire on posts	P	<i>Note: Surveyors were allowed</i>
216	Canopies not touching		314	Other fence	P	<i>to add unique codes in each</i>
217	Hedgerow		321	Hedge > 50% hawthorn	P	<i>Square, therefore certain</i>
222	Larch		322	Hedge > 50% other	P	<i>codes will not be listed here</i>
225	Pine - Scots		323	Mixed hedge	P	
228	Unspecified conifer		331	Stone bank	P	
231	Alder		332	Earth bank	P	
232	Ash		333	Grass strip only	P	
233	Beech		341	> 2m high		
234	Birch		342	1-2m high		
235	Bramble		343	< 1m high		
236	Elder		351	Stockproof
