

Response to Editor comments (April 2019)

Dear Editor,

Thank you for your consideration and your comments.

- 1) Please find attached a clean version of the manuscript.
- 2) I have modified the caption on Figure 1 to clarify the message, as suggested. It now reads: "A complete list of reference is provided in supplement to the main dataset (<http://doi.org/10.5880/GFZ.4.3.2019.001>)."

I hope that this will enable to proceed with the publication of my manuscript but please let me know otherwise.

With my best regards,
Cecile Blanchet
