I want to add two technical corrections to the previous post, regarding the format of the data downloaded from the Theia portal:

- Page 13. Line 6. It seems that the *productID_EXS_R2.tif* file is not provided in the zipped file right now. The zip file contains then 8 files in total.
- Page 13. Line 14. I think that you meant a *quicklook picture of the productID_SNW_R2.tif image*
