Received and published: 11 March 2019

Dear reviewer, thanks for the time you dedicated for reviewing this paper and all your good suggestions.

At the time the paper was sent for review, data from 2007 onward were not released and, therefore, not cited in the paper. In the meantime, we just released a brand new dataset with data from 2007 to 2011, added them in our JRC catalogue and assigned a DOI. Indeed we can only publish datasets whose monitoring reports are already

published, therefore up to 2011.

Because we have received plenty of comments by five different reviewers, it is difficult to reply to all of them one by one in this window; please have a look at the revised paper which takes into account them all.

A short description of the REMdb online query tool and its functionality was not included because we thought it would be out of the scope of this paper and, mainly, because we have plans to update it and change it very soon.

Newer data are also added to the new paper draft, please have a look.

Please also note the supplement to this comment:
