Dear Prof. Huettmann

We would like to thank you for your efforts in coordinating the review process. We have responded to all of the comments provided by the referees and revised our manuscript accordingly. The referees provided a large range of comments that have improved our manuscript.

Following your suggestion and the referees comments, we have revised the title to “ An interactive atlas for marine biodiversity conservation in the Coral Triangle”, as we think that “an Atlas” is more suitable to explain our data-sets compendium than a simple “Digital Map”. We also have amended the introduction, discussion sections and

C1

develop a metadata to our dataset.

Again, thank you for support.

Regards,

Irawan Asaad
