23 **Supplementary material – Part 2**

24 **A1. Database description**

25 The database includes 870 stations sampled during 24 cruises between 2004 and 2017 in the Western
26 Mediterranean Sea (the reference cruise 29AJ20160818 was included in this dataset as cruise #24
27 because, it is part of the CNR-ISMAR data collection program), mainly on board of research vessels
28 owned by the Italian National Research Council. It includes bottle data combined with CTD data.

29 In all stations, measurements were carried out with a CTD-rosette system consisting of a CTD SBE
30 911 plus and a General Oceanics rosette with 24 12-l Niskin Bottles at the observed depth of the bottle
31 sample. Temperature measurements were performed with an SBE-3/F thermometer with a resolution
32 of 10⁻³ °C and conductivity measurements were performed with an SBE-4 sensor with a resolution of
33 3·10⁻⁴ S/m. The probes were calibrated before and after the cruise. Except for salinity, no certified
34 reference material (CRM) was used. CTD salinity was calibrated against measurements made with a
35 salinometer.

36 Samples of nitrate, phosphate and silicate were frozen to -20°C and stored before being analysed in
37 laboratories onshore.

38 Measurements were subjected to a rigorous quality control (primary and secondary quality control)
39 and the dataset presented is the product adjusted after the application of quality control approaches.

40

41 **A2. Database organization details**

42 Cruise identification: To guarantee the comparability between measurements, an alphanumeric
 43 identification code (ID) together with an expedition code (Expocode) are defined a unique identifier.

Parameter	Unit/format	Variable in dataset	Method/ description	Comment	Original dataset	Adjusted dataset
Expedition code	12 digits	EXPCODE	<i>Shipcode_yyyy_mm_dd</i> <i>yyyy_mm_dd: starting day</i>		✓	✓
Cruise ID		CRUISE	From 1 to 24		✓	✓
Event date	yyyy-mm-dd	DATE			✓	✓
Event time	hhmm	TIME			✓	✓
Day	dd	DAY			✓	✓
Month	mm	MONTH			✓	✓
Year	yyyy	YEAR			✓	✓
Longitude		LATITUDE			✓	✓
Latitude		LONGITUDE			✓	✓
Station number		STNNBR			✓	✓
Niskin bottle number		BTLNBR			✓	✓
Cast number		CASTNO			✓	✓
Pressure	dbar	CTDPRS	CTD pressure		✓	✓
Depth	Meters	DEPTH	Depth from pressure		✓	✓
Salinity		CTDSAL	CTD salinity	PSS-78	✓	✓
Salinity flag		CTDSAL_FLAG_W	WOCE flags		✓	✓
Temperature	°C	CTDTMP	CTD temperature	ITS-90	✓	✓
Potential temperature		THETA	Theta from CTDTMP CTDSAL		✓	✓
Nitrate	μmol kg ⁻¹	NITRAT	standard colorimetric methods*		✓	✓
Nitrate flag		NITRAT_FLAG_W	WOCE flags After 1 st quality control		✓	
Recommended nitrate flag		NITRAT_FLAG_re	WOCE flags recommended final flagging	Details in Section 5.4		✓
Phosphate	μmol kg ⁻¹	PHSPHT	standard colorimetric methods*		✓	✓
Phosphate flag		PHSPHT_FLAG_W	WOCE flags After 1 st quality control		✓	
Recommended phosphate flag		PHSPHT_FLAG_re	WOCE flags recommended final flagging	Details in Section 5.4		✓
Silicate	μmol kg ⁻¹	SILCAT	standard colorimetric methods*		✓	✓
Silicate flag		SILCAT_FLAG_W	WOCE flags After 1 st quality control		✓	
Recommended silicate flag		SILCAT_FLAG_re	WOCE flags recommended final flagging	Details in Section 5.4		✓

44

45 * Standard colorimetric methods of seawater analysis (Grasshoff et al. (1999))

46 - **Data format**

47 *Original dataset: CNR_DIN_WMED_20042017_original.csv:* This is the original dataset with 24
 48 fields including flag variables of 24 cruises for nitrate, phosphate, silicate and CTD salinity from the
 49 primary quality control.

50

51 *Adjusted dataset: CNR_DIN_WMED_20042017_adjusted.csv:* This is the adjusted product with 24
 52 fields, after removing outlier data (issued from primary quality control) and after applying adjustment

53 factors from the secondary quality control. Recommendations of section 5.4 are included in the flag
54 variables
55
