

Comments to the Topical Editor:

We have adjusted the manuscript according to your suggestions below:

- (1) Please add the DOIs to the references (as "<https://doi.org/>" code. Most citations are from journal publications which surely have DOIs (I usually use a simple Google search with the full reference)
- (2) For Mohajer et al. (2011), please change " arXiv preprint arXiv:1103.4767, 2011. 2011" to " arXiv preprint available at <https://arxiv.org/abs/1103.4767>", 2011"
- (3) Please make sure that all DOIs and URLs are "executable", i.e. have active links
