Received and published: 13 March 2020

Numerous issues were raised by David Carlson. We have responded in detail to each of those comments in the attached document.

We consider the issues regarding open access and copyright to be troubling as these were topics of extensive discussion with the contact editor prior to submission and were considered settled. However, that does not appear to be the case. We look forward to further guidance from ESSD editors on what is required in this regard. We will then assess whether or not our paper is appropriate for ESSD.

Please also note the supplement to this comment:
