

Interactive comment on “CHLSOC: The Chilean Soil Organic Carbon database, a multi-institutional collaborative effort” by Marco Pfeiffer et al.

Anonymous Referee #2

Received and published: 31 October 2019

Comments by anonymous referee on: CHLSOC: The Chilean Soil Organic Carbon database, a multi-institutional collaborative effort Data: 1. I would prefer unabbreviated column headings with units or an explanation table for column headings and units in the data paper. 2. There are 0 values in columns oc and crf in the data – is this possible?

I have a track changed manuscript available for the author but have attached a pdf as that is what is allowed here - there are two paragraphs that I don't understand and quite a lot of minor alterations to the flow of the writing. Apart from that, I think its a good paper. The data (with column headings and units explained in full) will be a useful addition to the published data.

Please also note the supplement to this comment:
