

Re: Manuscript essd-2019-180

Dear editor,

Thanks for your positive response!

We followed your advice to make our code available.

It was created to solve the tasks at hand and has not been designed to provide a streamlined workflow for other users, and many comment sections may be insider jargon rather than directed to a wider public. Nevertheless, it is publicly available under a GNU GPLv3.0 license at the following repository:

https://github.com/TVSchuler/Sval_Imp_matlab

we have updated the data availability section of our manuscript to now include also the above information, see attached document.

Technically, how do we proceed further to upload the updated version?

Thank you very much for your time in this matter!

Best regards,

Thomas V Schuler
