

Interactive comment on “Exposure data for global physical risk assessment” by Samuel Eberenz et al.

Samuel Eberenz et al.

samuel.eberenz@usys.ethz.ch

Received and published: 10 February 2020

We would like to thank the two anonymous reviewers for their insightful comments and suggestions.

Based on their comments, we were able to revise the manuscript thoroughly to make a clearer statement of achievement, add additional information on data source used and the resulting data set, and improve the readability of the manuscript. Our revisions address all comments by the reviewers and affect all sections of the paper. In Section 2 (Data and Methods) and 3 (Results), we rearranged the subsections and added a world map to give an overview over the resulting asset exposure data (Figure 2). Additional information regarding country data are added to the supplement of

the revised manuscript. We are confident the revisions in the manuscript included in response to the comments of the two referees help to increase the general readability and strengthen the message of the manuscript.

Please refer to the PDF attached for our responses to the referee comments and details on revisions in the manuscript.

Please also note the supplement to this comment:
