

30 April 2020

Dear Kirsten and ESSD Colleagues,

I have now uploaded the LaTeX file for the manuscript `essd-2019-210`, as well as the figures and the BiBTeX file. Please note the comments to the typesetter inserted near the start of the LaTeX source file, and maintain the specific choices of font types, as they carry particular meanings within the context of this paper.

I am still waiting for the release of the latest version of the MISR Toolkit for Windows computers: my NASA JPL colleague had promised it for the end of last week, so I assume this will be imminent. As soon as we get this essential library, we will generate the Virtual Machine code to be made available through GFZ (on web page [10.5880/fidgeo.2020.011](https://www.gfz-potsdam.de/en/webpage/10.5880/fidgeo.2020.011)), together with its dedicated user manual.

Best regards, Michel Verstraete.
