

Interactive comment on “Data rescue of daily climate station-based observations across Europe” by Joan Ramon Coll et al.

Anonymous Referee #2

Received and published: 21 April 2019

This reader did not find evidence, beyond number of daily station data digitized or efforts spent in digitization, that these data made any useful contribution. One presumes the authors intended such a contribution, but they have largely failed to convince readers and future users. See supplement.

Please also note the supplement to this comment:
