Received and published: 21 July 2019

Dear Editor, dear Reviewers,

Please find the revised manuscript "The spatial allocation of population: A review of large-scale gridded population data products and their fitness for use" (revised title).

We addressed all comments made by the two reviewers point by point. In the uploaded file (pdf) you will find our responses to reviewers' comments first (pp. 1-7), followed by the revised manuscript. In our response, we included the page and line numbers for the revisions made in the manuscript to facilitate identifying the changes.

We would like to express our gratitude to Tracy Kugler and Stephen Matthews for their thoughtful comments and constructive critiques and suggestions. Addressing those comments and suggestions resulted in an improved manuscript. Your positive evaluation and support is greatly appreciated.

Please let us know if you need any additional clarifications.

Best regards,

Stefan Leyk (corresponding author) and the POPGRID collaborative.
