

Interactive comment on “A multi-sensor satellite-based archive of the largest SO₂ volcanic eruptions since 2006” by Pierre-Yves Tournigand et al.

Anonymous Referee #2

Received and published: 29 August 2020

I encourage the authors to re-submit. The new data archive promises to be of great value to studies of volcanic plumes. The current version of the manuscript does not demonstrate this potential, and a revised version will encourage more volcanologists to download and use the archive.
