Received and published: 27 November 2020

We thank the reviewer very much for the insightful comments and suggestions. We are pleased to read that the reviewer is complimentary about the manuscript and recognises the value of our dataset for the research community. The reviewer addresses a number of important topics, which we overall agree with and which have all been addressed in the revised manuscript. Please see our point-by-point responses to the individual comments in the attached PDF, where the reviewer comments are in black and the author responses are in red.
