

Trade-wind clouds and aerosols characterized by airborne horizontal lidar measurements during the EUREC4A field campaign

by Chazette P. et al.

General comments

The overall quality of the preprint is very good showing a well written manuscript. However, some technical corrections must be performed before publication.

Specific comments

No specific comments are raised when reviewing this manuscript.

Technical corrections

Page 1

L23. Replace “sensing” by “sensing techniques”

L25. Replace «made it » by « made »

Page 2

L14. Add more recent references (2019-2020)

Page 3

L1. Replace « much better » by « very efficiently »

L11. Omit « Both »

Page 4

L8. Define « LSCE »

Page 5

L12. Replace « (and » by « and »

L13. Replace « Flatness « by « The window Flatness »

Page 6

L23. The « prototypical flight » could be « flight strategy

Page 8

L8. Replace « boundary layer « by « Planetary boundary layer »

Page 10

L6. Replace « begining » with « starting »

L13. Replace “native” by “raw”

L15. Omit “it”

Page 17

L5. Replace “nadir” by “nadir”

Page 18

L1. Replace “consid, Fered » by “considered »

Page 29

L5. Replace « further » by « forthcoming »
