Received and published: 8 December 2020

Page 31, Figure 2: Three nests are indicated in the Figure and are referred to as D00, DO1, and D02. However, the data sets (which are available at the following link: https://dashrepo.ucar.edu/dataset/60_pinto/file.html) refer to domain D02 and D03. Do the domains in the dataset called D02 and D03 refer to D01 and D02 in the paper, respectively?

Page 28, Line 670: Three concentric nests are employed to achieve the downscaling using WRF LES. Was ndown.exe utilized to create the finer grid resolution and perform a one-way nested run?
