Received and published: 14 February 2021

Dear reviewers,

we would like to thank you for your helpful comments that are helping us to improve our manuscript. The most important changes in the new version of the manuscript are

- a re-structuring of the manuscript sections to streamline the text following Reviewer 1
- an extension of the GNSS validation following Reviewer 2
- generally the clarification of several points that have been misleading in the original text.

Please see attached PDF for our point-by-point answers to the your suggestions.

Best regards, Simon Deggim and Annette Eicker (on behalf of all co-authors)
