

Response to the reviewers' comments (rev 3)

Deggim et al.

We would like to thank the editor Christina Voigt for his suggestions for technical corrections. According to the points stated in the minor revision comment, we have changed the manuscript as follows:

- Reordering of references that were not in alphabetical order.
- DOIs were added to all references with available DOIs. For Döll et al. 1999, no DOI seems to be available.
- Minor corrections were made to the references to align with the desired reference style.

Best regards,

Simon Deggim and Annette Eicker (on behalf of all co-authors)
