This data set was completed with the support of China's 13th Five-Year Key R&D Plan, which has been downloaded 1481 times (<https://zenodo.org/record/4049958#.YE6hljmd0dU>), and we have received many user's suggestions and good comments. A new high-temporal-resolution dataset version 2 (<https://zenodo.org/record/4588293#.YEweeTmd2U>) has been reproduced and provided to users, and we have also made corresponding changes to manuscript. The key R&D project team of China has conducted applications and tests and believes that the accuracy of the new data set is better. Thanks to everyone for valuable suggestions, which greatly improved the quality of our data sets and manuscript.

C1

Thanks again.
