

## RESPONSE TO REVIEWER

---

**Review of Manuscript No.: essd-2020-327**

**Title: SLOCLIM: A high-resolution daily gridded precipitation and temperature dataset for Slovenia**

**Authors:** Nina Škrk, Roberto Serrano-Notivoli, Katarina Čufar, Maks Merela, Zalika Črepinšek, Lučka Kajfež Bogataj, Martín de Luis

---

We are thankful to the Reviewer for his feedback. In this second Response to the Reviewer's files, we provide documentation of the changes that have been made in response to the reviewer's suggestions. The original comments are shown in **bold text** and the author responses are shown indented in plain text.

**# Martin Hanel (Referee)**

**l. 150 - consider reformulation of the added sentence to make it more precise**

Thank you for your comment. Based on your suggestion, we have changed this sentence to make it more precise.

**l. 199 - there is also (small but) obvious negative bias for high precipitation amounts, consider discussing this.**

Thank you. Modified as suggested.
