Dear Paula Marques Figueiredo,

we appreciate the effort and time that you dedicated to our manuscript, which certainly helped to improve the quality of the revised version. Your main concern regarding the correlation of the lower terrace levels to MIS-5c or 5a has been addressed by including a comparison with MIS-5e uplift-rate estimates, one additional figure, and an extended discussion on this topic. We provide our point-by-point answer to your comments in the attached PDF.

C1

Kind regards, R. Freisleben, J. Jara-Muñoz, D. Melnick, J.M. Martínez, M.R. Strecker
