Response to editor

Editor's comments in black and authors response in blue.

Line 579, Table 2 caption: double check the statement: "The bias (mean – σs) and error (standard deviation - σr)", which seems to indicate that bias=(mean–σs) and error=(standard deviation-σr). Please double check to make sure this is correct and it is what you have intended or to make any necessary changes.

We have changed this to read: "bias = (mean: σs) and error = (standard deviation: σr)" to avoid confusion on Line 567, Table 2.

For the next revision, I kindly ask you to remove the Copernicus logo from page 41.

We have removed the logo as requested
