

Dear reviewer,

Thank you for your further comments that we have taken into account:

Authors should still improve presentation quality.

Only giving examples due to lack of time:

Figure 2, line break precipitation

Corrected. This occurred when converting to jpg, and now solved by using a png file

Figure 3, unit style

Unfortunately the software used to add the unit does not allow to change the style.

Figure 15, Mean Absolute Error (MAE) is supposed to have a unit

The figure shows 'standardized' MAE, and therefore without units. We have added it in the legend and make it consistent through all the document.

We still believe Table 1 and Table A2 need to be improved. We didn't find a quick fix for them in latex, as tomorrow is the deadline to re-submit this paper. However, during the editorial process we hope to have another chance to provide a better quality table. For the rest of the document, we believe the aspect-ratio of some figures could be better, but again we hope to make it better during the editorial process.

Kind regards,

Joaquin Munoz Sabater
