

The reviewers are satisfied with the authors' revision. I have few comments for the authors' consideration:

*Response: We appreciate the comments and suggestions of the editor and the reviewers.*

1. Avoid using the red-green pair (which is not blind-friendly) in the figures.

*Response: We checked all the figures and re-drew all the affected figures to assure all the plots accessible to those with color vision deficiencies.*

2. The captions in some figures (e.g., Fig. 8) are oversimplified. Please add more details to make them clearer.

*Response: We have gone through all the figure captions and revised accordingly to make them clear and informative.*

3. Fig. 8, please adjust the blank space between the top and bottom panels. Also check other figures' format.

*Response: We updated Figure 8 by reducing the gap between the panels. We also checked all the other figures.*
