Title: DL-RMD: A geophysically constrained electromagnetic resistivity model database for deep learning applications

Dear editor, topical editor, and the editorial support assistance,

The authors would like to thank you for your valuable time and contributions during the review process of the paper accepted for publication titled above. As per the comment of the topical editor, we have carefully revised the manuscript for any grammatical errors.

Additionally, it has been mentioned file validation phase that the reference list includes works "in review". It is to inform that it is a misunderstanding which has been communicated earlier that work that is being pointed out is titled, "70 years of machine learning in geoscience in review" which has been published in 2020. "in review" is in the title of the paper. The authors were notified that a note will be added into the system to avoid the misunderstanding. However, the DOI of the said reference is included in this submission.

On behalf of the authors
