

Dear Production Team,

This is regarding our manuscript esd-2022-460 entitled “Spatiotemporal variability of pH and carbonate parameters on the Canadian Atlantic Continental Shelf between 2014 and 2020” by Gibb et al.

This letter is to let you know that I provide here a slightly different version of the manuscript than the one accepted by the topical Editor. I already contacted the Editor by email on August 3<sup>rd</sup> 2023 to mention this.

The differences are very minor and are related to error calculations that appear in Table 2d (there is a reduction of the error following a bug found in our error calculation). The text was slightly modified to take into account these differences, but the main results of the study remains the same.

Thanks and Best Regards,  
Frederic Cyr
