Responses to #Reviewer 4

The authors have convincingly responded to my concerns related to Figure 5. They might also mention these aspects briefly in the text.

[Response]: Thanks for your positive comments and constructive suggestions for our manuscript to improve the quality of our manuscript. We have carefully addressed the comments and suggestions in the revision, and detailed revisions and responses are listed below. In addition, we have used tracks to highlight the revisions in the revised manuscript.

We have added the relevant discussion on Figure 5 in the Discussion section in the revised manuscript (see Lines 424–427).

I, therefore, only have minor suggestions with respect to the wording (see attachment). I suggest accepting the manuscript, subject to minor revisions, followed by an editor's review.

[Response]: We have revised the wording according to the attachment. In addition, we have also checked and revised the wording for full manuscript in the revised manuscript.
