Air pollution emission inventory using national high-resolution spatial parameters for the Nordic countries

Supplement

Table S1 Main spatial proxies for all SNAP sectors used in the Nordic Countries.

SNAP sector		Denmark	Finland	Iceland	Norway	Sweden
01	Energy	Point sources	Point sources Municipal energy production fuel use		Point sources	Point sources
02	Non-ind. combustion	Chimney sweeper data Building and dwelling register	Building data Residential area type Heating degree day Average wood use		Building number and type Wood consumption	Building number and type Wood consumption
03	Manufacturing industry	Point sources Land use	Point sources Municipal energy production fuel use	Point sources	Point sources	Point sources
04	Production processes	Point sources Land use Employment statistics Building data	Point sources Municipal energy production fuel use		Point sources	Point sources
05	Extraction and distribution of fuels	Point sources Building data Service stations Gas network data	Land use Population			
06	Solvent and product use	Population Building data Land use Road network	Land use Population		Population	Population
07	Road transport	Road and traffic data	Road and traffic data Municipal fuel use and vehicle-kilometres	Traffic modelling	Road and traffic data Share of HDV CO2 emission at regional level	Road and traffic data Share of HDV CO2 emission at regional level

08	Machinery and off-road	Aviation data Land use Fishing areas and catch statistics Military training areas Construction statistics The Danish land use matrix	Land use Road and traffic data		Land use	Land use
09	Waste	Point sources Building data Population Land use Waste and recycling data	Population Land use			
10	Agriculture	General Agricultural Register Central Husbandry Register Fertilizer and livestock reporting Land use The Danish land use matrix	Land use Municipal animal numbers		Land use	Land use
