

# Supplementary Material

## Supplementary images and data

**Figure S 1 | Number of terminus delineations before and after filtering**

Overview of terminus delineations for each tidewater glacier before (blue) and after filtering (purple), with numbers indicating the number of filtered and all delineations, and the percentage of kept observations.

**Table S 1: Spatio-temporal resolutions and uncertainties of input datasets**

Spatial and temporal resolutions for each input dataset and uncertainties associated with them.

Dataset	Spatial resolution [m]	temporal resolution	uncertainty +/- [m]
TermPicks	30 15	1908 -2020	Landsat 4/5: 5.6 Landsat 7/8: 3.6
ArcticDEM	2	Glacier dependent	0.1
AeroDEM	25	Glacier dependent	6
BedMachine v4	150	2017	See Table S1 for mean error
Ice flux	N/A	1985-today (monthly to bi-weekly)	Taken from Mankoff et al. (2020)
ITS_LIVE Velocities	240	1985-2019	Not need for processing (see raw data)

**Table S 2 | Overview of location, mean bedrock topography error, and mean annual frontal ablation for each glacier.**

Name, region, and latitude/longitude shown for each glacier as well as mean bedrock topography errors extracted along the centerline from BedMachine v4 (Morlighem et al., 2017, 2021)), and annual frontal ablation estimates for each tidewater glacier for the period 1987 – 2018 (period where observations are available for all tidewater glaciers).

Name	Region	Lat	Lon	Mean bedrock topography error (along centerline) [m]	Annual mean frontal ablation (1987-2018) [Gt/yr]
Akullersuup Sermia	SW	64.38	-49.48	29.00	0.73

**Table S 3 | Comparison of decadal mean frontal ablation estimates**

Comparison of mean frontal ablation estimates [GT/a] from Kochtitzky et al. (2023) and this study for the periods 2000-2010, and 2010- 2020. Only shows tidewater glaciers that are investigated in both studies. Colours indicate where estimates presented in this study are within the uncertainty boundaries of Kochtitzky et al. (2023).

Glacier names	Kochtitzky et al. (2023)		This study	
	Annual mean 2000-10	Annual mean 2010-20	Annual mean 2000-10	Annual mean 2010-20
Akullersuup Sermia	0.76±0.24	0.58±0.13	0.72±0.15	1.51±0.15
AP Bernstorff Glacier	4.98±0.11	4.63±0.08	4.31±2.16	4.49±2.6
Apuseerajik	2.36±0.08	2.97±0.06	2.53±1.10	3.54±1.10

**Figure S 2 | Results for A.P. Bernstorff Glacier**

Example of output data for Helheim Glacier, SE Greenland shown in A) with three-monthly frontal ablation estimates shown in yellow, and discharge (blue) and terminus associated mass change (TMC, red) shown for comparison. Maximum error is also shown (for details see supplementary). B) Annual flow velocity in m/yr from NASA ITS\_LIVE data B) Terminus position (TP) relative to most recent observation along the centerline. Panels B) and C) are only shown for validation purposes and are not part of the dataset. D) Terminus positions used to calculate frontal ablation estimates colour coded by date.

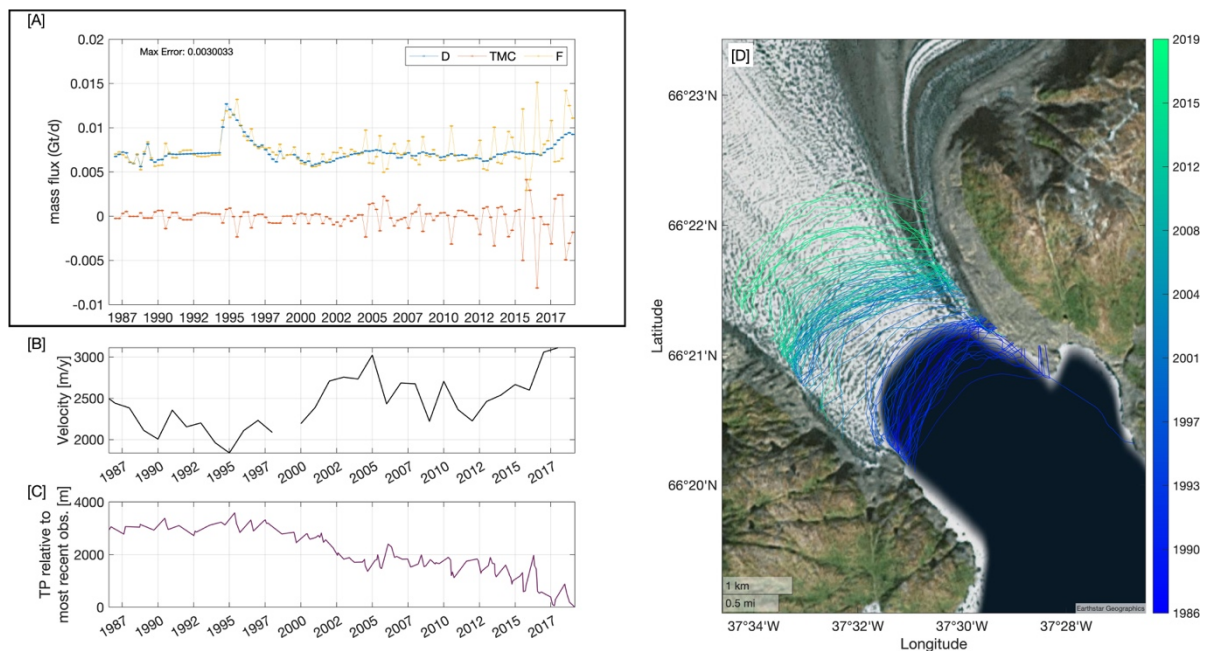

**Figure S 3 | Results for Akullersuup Sermia**

Same as in Figure S 2

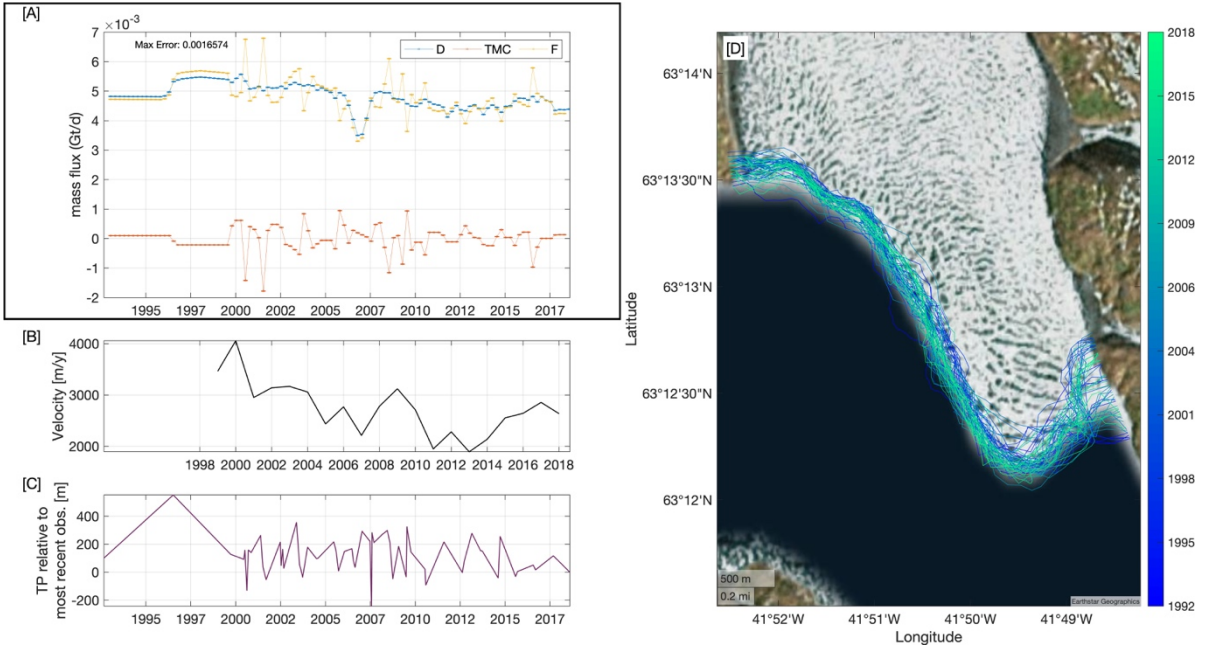

**Figure S 4 | Results for Akullikassaap Sermia \*Volume Only\***

A) Annual flow velocity in m/yr from NASA ITS\_LIVE data B) Terminus position relative to most recent observation along the centerline. C) Volume change displayed only as no discharge data from Mankoff et al. (2020) available. D). Mass of each polygon that is associated with a terminus delineation, colours correspond to individual terminus position shown in E. E) Colour-coded terminus positions to correspond with frontal ablation data. Basemap from Earthstar Geographics.
