Re-review of the manuscript ID essd-2023-422-ATC2 '*A hydrogeomorphic dataset for characterizing catchment hydrological behavior across the Tibetan Plateau*' submitted to *ESSD*.

Recommendation: **ACCEPT**.

I checked the updated version of the manuscript and compared it to the earlier draft.
The paper has been revised by author as per advises of reviewers.
The authors provided point-to-point replies to the reviewers and argued their answers.
I confirm that the authors made improvements and updated the manuscript.
They revised the content of the paper and corrected some sentences and phrases.
Also, the authors proofread the text throughout the manuscript and corrected occasional mistakes (e.g., articles "the", etc).
Revised manuscript is improved and can be accepted for publications.

With kind regards,
- Anonymous Reviewer.
