Dear Editor!

The authors have taken into account, where possible, the comments made on the quality of the data presented in the database. Useful additions to Table 1 and Table 2, as well as the text (L 464-474, 557-558 and others) has been made. The quality of the illustrations and explanations to them has been significantly improved.

I believe that the edited manuscript can be published in the journal.

With respect,

Galina Kopylova
