

Dear Editors,

we thank you for the positive feedback and making us aware that the option of using an appendix exists. As suggested, we moved all the supplementary figures into the appendix (referred to as A) of the main manuscript where they are more accessible. Furthermore, we switched the layout of the only table in the supplement to landscape format to avoid the line breaks and make it more readable.

On behalf of the authors,

Alexander Wachholz

Changes made to the manuscript:

- Line 109: Figure S1 changed to Fig. 1
- Line 182: Fig. S1 changed to Fig. A1
