

Red marked data: We found that some data were previously presented with only two significant digits, with the trailing zero automatically omitted. Since all other values have three significant digits, we prefer to add the trailing zero to ensure consistency in the presentation.

Yellow marked data: We rechecked the saved accuracy evaluation data and found that some of the statistics were not correctly updated. Although the differences are very small and do not affect the overall conclusions, we would like to present the corrected accuracy assessment statistics.
