

Please ensure that the colour schemes used in your maps and charts allow readers with colour vision deficiencies to correctly interpret your findings. Please check your figures using the Coblis – Color Blindness Simulator (<https://www.color-blindness.com/coblis-color-blindness-simulator/>) and revise the colour schemes accordingly with the next file upload request. --> Fig. A2, A4

Thanks for the suggestion. I had already changed the figure in the last review round. According to Coblis – Color Blindness Simulator, the current version of A2 and A4 is adapt for readers with colour vision deficiencies
