Dear Editor Robert Jackisch, Earth System Science Data (ESSD)

Thank you very much for handling our manuscript and for guiding us through the review process. We also appreciate your positive assessment and the additional technical suggestions. Below, we respond to each point and indicate the corresponding changes made in the revised manuscript.

We have implemented all technical corrections suggested by the Editor. In addition, regarding the authorship change, I confirm that I have received written email confirmations from all co-authors agreeing to add Dr Mateusz Kramkowski as a co-author. As the corresponding author, I hereby confirm this on behalf of all co-authors.

Finally, thank you also for your private note. We appreciate the comment regarding the introduction; we are glad that, despite its length, it provides useful geographical context for a data paper.

With kind regards,
Michał Słowiński
on behalf of all co-authors
