

Selected modelling results for historical extreme water levels and discharges of the Vistula River in Warsaw before 1951

Date	Vistula water level reconstructed in the respective study [cm]	Discharge [m ³ s ⁻¹]	Source
1813-08-30	794	7,180	Fal & Dąbrowski (2001a)
		8,400	Kuźniar (2008) – cyt. za Kuźniar & Magnuszewski (2010)
		7,430	Kuźniar & Magnuszewski (2010); Magnuszewski et al. (2012)
1844-07-27	850	8,223	Kuźniar (1997)
		8,890	Fal & Dąbrowski (2001a)
		8,250	Kuźniar & Magnuszewski (2010); Magnuszewski et al. (2012); Magnuszewski & Moran (2015)
1844-06-24	732	5,960	Wierzbicki (2001)
1924-03-27	738	5,464	Kuźniar (1997)
		5,860	Bogdanowicz et al. (2000); Fal & Dąbrowski (2001b); Wierzbicki (2001)
1925-07-06	653	3,800	Siebauer (1947)
		3,830	Jankowski & Stolarska (1978)
1931-09-30	672	4,180	Jankowski & Stolarska (1978)
1934-07-23	725	5,570	Siebauer (1947)
		5,550	Jankowski & Stolarska (1978)
		5,348	Kuźniar (1997)
		5,460	Magnuszewski et al. (2012)
1948-06-12	727	4,580	Jankowski & Stolarska (1978)
