

Author's Response

Manuscript: essd-2025-583

Global Surface Mining and Land Reclamation Time Series from 1985–2022

Dear Editor,

Thank you very much for your continued support and for the opportunity to check the final version of our accepted manuscript. During this final proof stage, we would like to complete and correct the affiliation information for the author list. In the previously submitted version, the institutional affiliations of several co-authors were not fully captured, and some co-authors hold additional affiliations (e.g., further research institutes and laboratories) that should also be acknowledged. We have therefore added the corresponding affiliations for each author so that the institutions are accurately and completely represented. We would like to confirm that these changes are limited to the affiliation information only: the author list, the order of authors, the corresponding-author designation, and the author contribution statements all remain unchanged. We apologize for any inconvenience this late addition may cause, and we would be glad to provide any further documentation should it be required. The updated author information is shown below, with the newly added affiliations **highlighted in yellow**:

Revised text:

Sucheng Xu ^{a,c,l}, Jiatong Zhou ^{a,l}, Kechao Wang ^{a,g}, Stefan Giljum ^c, Victor Maus ^{c,d}, Tim T. Werner ^e, Liang Tang ^f, Jiwang Guo ^a, Wu Xiao ^{a,b,h,i,*}

a School of Public Affairs, Zhejiang University, Hangzhou, China.

b Land Academy for National Development, Zhejiang University, Hangzhou, China.

c Institute for Ecological Economics, Vienna University of Economics and Business (WU), Vienna, Austria.

d Novel Data Ecosystems for Sustainability Research Group, Advancing Systems Analysis, International Institute for Applied Systems Analysis (IIASA), Laxenburg, Austria.

e School of Geography, Earth and Atmospheric Sciences, University of Melbourne, 221 Bouverie Street, Carlton, VIC, 3010, Australia.

f College of Earth and Planetary Sciences, Chengdu University of Technology, 610059 Chengdu, China.

g Department of Urban Design and Planning, University of Washington, Seattle, WA, USA.

h Inclusive and Smart Urban-Rural Governance Lab, Zhejiang University, Hangzhou, China.

i Zhejiang Key Laboratory of Agricultural Remote Sensing and Information Technology, Zhejiang University, Hangzhou, China

We sincerely appreciate your understanding and kind assistance.

With best regards,

On behalf of all authors,

Wu Xiao (corresponding author)
