

Responses to editor's remark point by point

MS No.: essd-2025-64

Title: Remote sensing of young leaf photosynthetic capacity in tropical and subtropical evergreen broadleaved forests

Author(s): Xueqin Yang et al.

Remarks from the preceding review file validation

The ROR database lists the institution of the corresponding author but with a different city than given in the manuscript's affiliation. Please clarify whether the ROR in the system "Sun Yat-sen University (Guangzhou, China)" is still correct.

***Response:** Thank you for your remark. The ROR entry "Sun Yat-sen University (Guangzhou, China)" is correct, as it reflects the official main campus location of the institution. The School of Atmospheric Sciences, to which the corresponding author is affiliated, is located in Zhuhai. Therefore, the manuscript affiliation correctly states Zhuhai as the city. Please let us know if any additional information is required.*
